

Obstetrics Departments face escalating risks.

We help you protect your healthcare providers, patients and organization.

Each year, Med-IQ develops a new suite of data-driven courses targeting emerging clinical risks in obstetrics. Our online modules use case studies to contextualize risk in order to prevent adverse incidents.

We partner with you to...

Assess knowledge gaps

Deliver customized online education

Fulfill CME requirements for MDs and APPs (or similar)

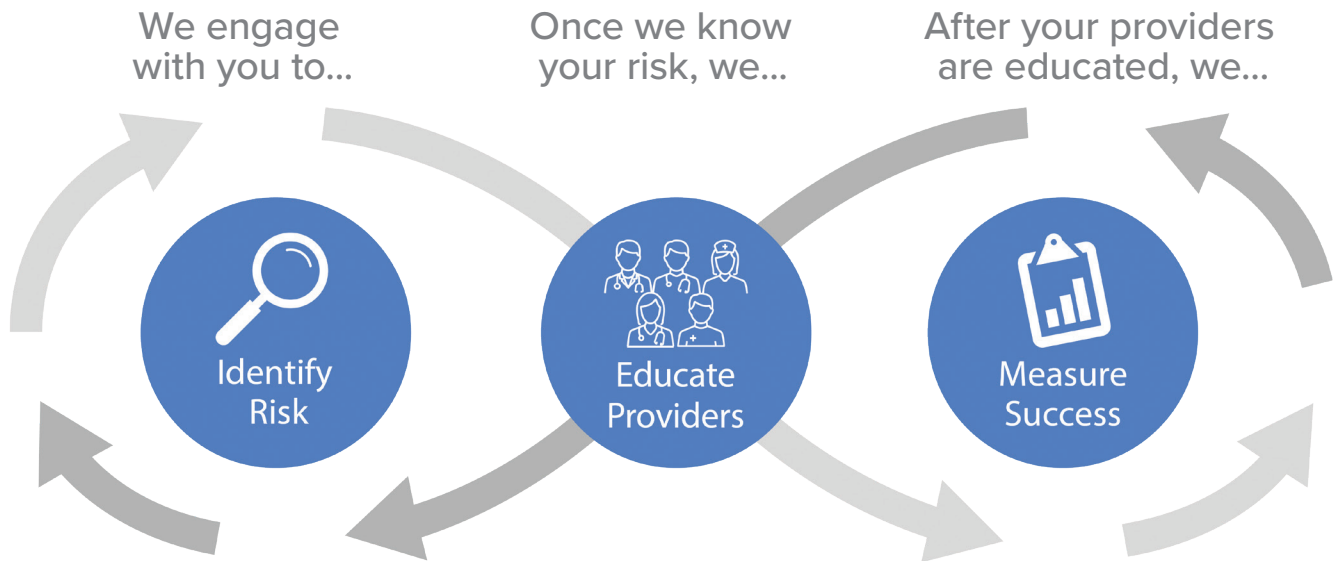

Measure what was learned

Obtain a qualitative and quantitative risk profile of your providers

To see a customized sampling of available courses based on your unique needs, please visit our interactive **Course Selection Tool** at www.med-iq.com/courses or by scanning here:

Here's how it works:

Sample Course List

My Courses

A grid of five course cards, each with a blue icon of a monitor with a star, a three-dot menu, a title, a green 'Available' status indicator, and a purple 'Launch' button with a right arrow. The courses are:
